Group Overview

Deraya Contracting Company – Jordan:

Established and registered in Amman, Jordan, since 2006, Deraya specializes in the construction, maintenance, and operation of water and wastewater pumping stations and treatment plants, in addition to MEP works for industrial buildings.

In addition, Deraya has good records in the MEP works for residential and commercial buildings

Deraya Contracting Company – Syria:

Established and registered at Homs, Syria in 2010. It is on hold since 2011 due to the unfortunate conditions in Syria.

Curves Trading Company – Jordan:

Established and registered at Amman, Jordan in 2019. It was established to become a reliable source specialized in providing water and wastewater equipment to the Jordan and regional market.

Alderaya Construction Company – Saudi Arabia:

Established and registered in AL-Riyadh, in 2024. It was established to serve the visions and the promising and challenging market of the Kingdom of Saudi Arabia.

- Establishing a strong and dynamic organization for the whole group and for each individual establishment.
- Keep our teams equipped and updated with the latest resources, developments, and technologies.
- Reinforce the team-work culture and ethics among our human assets.
- Reinforce the initiative and the right decision-making abilities among our teams.
- Reinforce the culture that we are serving the regional societies as well as we are taking care about our organizations.
- Keep eye on the new developments in the market and optimizing the implementation of these new developments to serve the goals of our organization and our customers.

Establish a contracting group that is highly committed, strong, dynamic, and reliable to serve the regional market in alignment with rapidly evolving technologies, developments, innovations, and professional and technical practices while respecting ethics, values, safety, quality, environment, and health.

Deraya Remarkable Projects

01

Project Name : توريد وتركيب مضخة ثالثة للمحطة السادسة

Owner: Jordan Water Company-Miyahuna LLC

Consultant: Jordan Water Company-Miyahuna LLC

Project Period: 6 months

Description of Works:

The work included the removal of the existing vertical turbine pump and the supply and installation of a new vertical split case pump with a capacity of 2000 m³/hr at a 71-meter head. A variable frequency drive (VFD) panel was installed, along with motorized butterfly and gate valves, an electromagnetic flow meter, and a check valve.

Station piping made of material 1.4301, as well as pressure transmitters and gauges, were installed. Additionally, a new 2.5-ton split unit was installed in the electrical room. The existing LV and MV panels were modified to accommodate the new components, control cables were transferred within the PLC panel, and the local SCADA system was upgraded.

Civil works included demolishing the old pump foundation and constructing a new one, along with other structural modifications as per tender requirements.

02

Project Name: فك وتركيب مضخة من محطة لب الى محطة خو

Owner: Jordan Water Company-Miyahuna LLC

Consultant: Jordan Water Company-Miyahuna LLC

Project Period: 60 days

Description of Works:

Dismantling, transporting, installing and operating an 800KW Pumping Unit from Libb pumping station to Khaw Pumping station. The works include supply and install and commission A 1000KW Variable Frequency Drive (VFD) operation panel with all related instruments, electrical, mechanical, and civil material and works in addition to Modifications on (PLC), HMI and SCADA

03

Project Name: Separation of Potable Water Network

Owner: Airport International Group-AIG

Consultant: Airport International Group-AIG

Project Period: 120 days

Description of Works:

Separate the potable water network from the firefighting network by constructing a new pumping station dedicated to supplying the potable water to the terminal building and other QAIA facilities, including the civil works such as excavation, casting concrete, building the pumping station, and all mechanical work such as supply and install pumps, valves, pipes...etc... The works also include testing and commissioning of the new pumps, and the required training.

04

Project Name: شراء عدادات ذكية / استبدال مأخذ
الوحدات الزراعية في مشروع ري قاع السعيدين

Owner: Wadi Araba Development Company

Consultant: Wadi Araba Development Company

Project Period: 60 days

Description of Works:

Supply, installation and equipping electrically and mechanically of 60 units of smart irrigation hydrants including flow meter, shut off valves, flow limiting device and control module all protected in ss enclosure in addition to supply spare parts for existing smart irrigation hydrants installed in Rahma and beer mathkour projects.

05

Project Name: Construction of a New Mechanical Maintenance Hanger & Building

Owner: Arab Potash Company

Consultant: Mostaqbal Engineering & Environmental consultant

Project Period: 365 days

Description of Works:

Construction of a new Mechanical Maintenance Hanger and Building of the Arab Potash Company and implementing all electrical works such as the LV system, lighting system, power system, fire alarm system, grounding and lightning systems in addition to the mechanical works (Drainage, water supply system, HVAC, firefighting system and all other needed MEP works .

Project Name: Treated Sewage Effluent (TSE)
Pumps Replacement

06

Owner: Aqaba Water Company

Consultant: Arabtech Jardaneh

Project Period: 240 Days

Description of Works:

- 1-**Supply, Installation, Testing and commissioning of vertical turbine pumps.
- 2-**Supply, Installation, Testing and commissioning of Check Valves.
- 3-**Supply, Installation, Testing and commissioning of Electrical Works.

07

Project Name: Supplying and operating wells in Wadi Araba

Owner: Wadi Araba Development Company

Consultant: Wadi Araba Development Company

Project Period: 10 months

Description of Works:

Supply, install & operate Control Buildings, Submersible pumps & riser pipes & equipment for wells, Conveyance HDPE pipe lines, and all Electrical Installations and Connection to Transformers / Main Electrical Grid

08

Project Name: Pumps replacement for remote villages

Owner: Aqaba Water Company

Consultant: Aqaba Water Company

Project Period: 356 Days

Description of Works:

- 1-Rehabilitation the civil, architectural, Mechanical and electrical works for the existing buildings.
2. Carrying out all required (Civil, Architectural, Mechanical and Electrical Works) for the described pumping stations.
3. Design and Construction of new pumps room.
4. Supply, Install, Testing and Commissioning of pumps with all required, valves, pipes, fittings, surge equipment & electrical equipment.

09

Project Name: Rehabilitation of Irrigation Network and Pump Stations at Wadi Araba, Supply & Install Smart Irrigation System (Two Projects)

Owner: Jordan Valley Authority

Consultant: Wadi Araba Development Company

Project Period: 12 months.

Description of Works:

Rehabilitation of irrigation networks, wells and pumping stations with related civil, mechanical and electrical works and replacement for damaged materials, and laying HDP main pipelines with flow meters and Solar systems.

Project Name: Water Supply Project from Mujib Dam to Northern Karak Governorate

Owner: Water Authority of Jordan (WAJ)

Consultant: Water Authority of Jordan (WAJ)

Project Period: 12 months.

Description of Works:

Construction of new pumping stations and water tanks with all related mechanical and electrical works and Preparing pipeline rout and laying main pipelines. The project is awarded as water project of the Year by the Global Water Intelligence in 2015.

11

Project Name: Za'atari Refugee Camp Water and Waste water Networks – Phase II including Maintenance & Operation

Owner: UNICEF

Consultant: GITEC Consult GMBH and CEC.

Project Period: 30 Months

Description of Works:

Construction of six Water Pump Station. Rehabilitation of three Water Pump Station, Construction of two Waste Water Pump Stations with emergency tanks and Force Mains in addition to SCADA System for the entire project. Maintain & operate the entire system, including electromechanical works.

12

Project Name: Construction and Rehabilitation Irrigation Network at Ghor Al Kabed

Owner: Wadi Araba Development Company

Consultant: Dorsch International Consultants GmbH (Leader) with AHT Group AG and Mostaqbal.

Project Period: 550 days

Description of Works:

Construction of new three Pump Stations (Turn outs 81, 91 & 95) including all electromechanical works & rehabilitation works for Pump Station at TO86 including Mechanical and Electrical Works, in addition to provide SCADA System.

13

Project Name: North badia host community water Supply - 2014 – Package 1 & 4

Owner: Yarmouk Water Company

Consultant: ICRC

Project Period: 5 months

Description of Works:

Carryout the Electromechanical works, Rehabilitation of five wells in North Badia in Mafraq Governorate in addition to Rehabilitation of pump stations for Rawdit Basma, Amraw Omera and Mudita villages in Mafraq Governorate.

14
